

Team number: 02

Meeting date: 4/21

Summary of UI Feedback

The current UI design lacks visual contrast, causing elements to blend into the background and making it difficult for users to distinguish between different components. To improve clarity, colors should be selected strategically to make key elements stand out more. Additionally, each category should have corresponding items displayed to ensure users can browse the full range of listings. The skill-sharing page needs to be expanded and made more obvious, including incorporating "skill sharing" directly into the title to clearly communicate that the platform supports both product sales and services. Search functionality should be separated between regular listings and skill-sharing posts, ideally using different tables to prevent confusion. Consider placing a smaller stock image on the home page that links to the skill-sharing section. On the login page, fix all non-functional links and add markers for required fields or label them explicitly to improve usability. For the messaging page, ensure both sides of the conversation are visible to provide a clear dialogue experience. For listing results, a "Contact Seller" button should be added, and a decision should be made on whether this button leads users to their inbox, opens a direct message box, or triggers a pop-up window. Finally, clicking the "Home" button should reset all search filters and display all available listings to restore the default view.

- Confirm that you have done architecture review to check that developers adhere to MVC pattern, coding style, minimal agreed documentation etc. Record if OK or list the issues found. Request developers follow up on corrections and follow up later by doing code reviews

The team has done architecture review to check that developers adhere to MVC pattern

- List below agreed upon P1 list of features for final delivery which constitute product plan. NOTE: after this meeting the team focuses solely on this P1 list of features, e.g. the development is in "feature freeze mode". All listed P1 features (no more no less) MUST be delivered in usable way, free of bugs and will be used for grading

Unregistered User

1. Unregistered shall register with email and passwords
2. Unregistered Users shall view posts.
3. Unregistered Users shall scroll through listings and view photos and descriptions.
4. Unregistered Users shall view skills and skill-sharing post descriptions.
5. Unregistered Users shall use keywords to search for products.

Registered Users

6. Registered Users shall buy products
7. Registered Users shall sell products
8. Registered Users shall sell services or skills
9. Registered Users shall view posts.
10. Registered Users shall scroll through listings and view photos and descriptions.
11. Registered Users shall view skills and skill-sharing post descriptions.
12. Registered Users shall upload images for listings.
13. Registered User shall describe products for sale.
14. Registered Users shall message sellers.
15. Registered Users shall use keywords to search for products.
16. Registered Buyer shall rate sellers after purchases.
17. Registered Users shall offer tutoring or skill tutorials.

Admin

18. Admin shall approve newly created posts
 - Any other comments and issues
 - Check Point (CP) if given, DUE: Contact Seller Button Flow
- Once pressing on "contact seller", a message will be sent to the seller with a predefined subject and message expressing interest in the item or skill being sold.
